SEPTEMBER 2017 Volume 1 - N° 1

Upgrade and Modernization Project is underway!

The WWTF Upgrade and Modernization Project has begun with the site preparation being completed for the primary clarifiers, 90 metres of overflow pipe being installed and the Computerized Maintenance Management System software being installed and training provided to key personnel. The Phase 1: Preliminary Treatment and Phase 2: Primary Treatment Construction Contract has been awarded to Pomerleau in the amount of \$12,500,000.00 before HST. Construction for this work will begin in September with a substantial completion date of March 31, 2018. This phase of the Project is expected to be on time and on budget! The Administration Building Upgrade is expected to be completed by the end of 2017

Patricia Casas – Wastewater Treatment Operator Class 4 Certification!

Patricia has achieved the highest level of wastewater operator certification in Canada! Once the wastewater treatment facility completes its upgrade in 2021, it will be designated as a Class 4 facility. Patricia's progressive vision and hard work means that TransAqua will already meet the Operator Certification requirements within any updated Approval to Operate.

TransAqua Sewer Do's and Don'ts Brochure

TransAqua has developed a public education tool to assist the public in better understanding what items belong in the sewer and which items do not! Please visit www.transaqua.ca to see this Brochure and sign up to receive updates from TransAqua.
